CITY OF VISTA GENERAL PLAN

COMMUNITY IDENTITY ELEMENT

ADOPTED BY THE CITY OF VISTA CITY COUNCIL

RESOLUTION NO. 75-186

CITY CLERK

JEAN BROOKS

Exhibit "B"

EXHIBIT B

COMMUNITY IDENTITY ELEMENT

The preservation of the semi-rural character and social charm of the Vista community is a desire of the citizens. Therefore, a community identity element is necessary to expose the components of this character and suggest a method for its preservation. Components of the Vista semi-rural community character are:

- a. Impressions of open, natural, and spacious land.
- b. Winding, uncongested streets.
- c. Quiet, peaceful background.
- d. Residential developments that do not conflict with light agricultural uses.
- e. Minimized development impacts on rural uses such as avocado, macadamia nut, and citrus groves, cactus, strawberry, commercial flowers, and other truck crops that harmoniously co-exist with a low-density semi-rural character community.
- f. Limited animal husbandry, such as horse boarding, on sufficient sized lots.
- g. Natural watercourses and background hillsides in visible evidence throughout the community.
- h. Natural ridge lines, native or quasi-native vegetation portraying a secluded, low key setting conducive to quiet, natural surroundings.
- i. Protect and enhance the traditional Spanish rancho theme which has been a positive attribute to this region for many years.

Thus to protect and perpetuate this semi-rural community character in the wake of intense community development precipitated by economic pressures, these nine components are guides to encourage voluntary consideration of the community identity.
